CPSC 473 - Web Programming and Data Management

Spring 2015

Homework Assignment 1, due the week of February 9

Complete the following steps.

1. Create a free account on GitHub, if you do not already have one.
2. Install and configure Git, a text editor, and a browser, as shown in Chapter 1.
3. Read https://help.github.com/categories/bootcamp/, and configure your computer for use with GitHub.
4. Fork the repository https://github.com/ProfAvery/LearningWebAppDev.
5. Clone your fork to a new local repository.
6. Complete the exercise on p. 51 of Chapter 2, "Build the FAQ Page for Amazeriffic."
7. Add your completed `faq.html` to the `Chapter2/Amazeriffic` directory.
8. Commit both the new page and your updated `index.html` to your local repository.
9. Push the changes from your local repository to your remote repository on GitHub.
10. Issue a Pull Request to incorporate your changes to my repository.

Submission

1. E-mail the following items to csuf.kenytt.net@gmail.com:
   a. A screenshot showing your rendered Amazeriffic FAQ page
   b. The URL of your GitHub page

2. In your Pull Request, include your name and your partner's name (if you have one)

Tips

● Be sure to issue the Pull Request to `ProfAvery`, not `semmypurewall`. Please do not annoy the textbook's author with spurious Pull Requests.

● Be sure to include the names of both partners in both the e-mail and the Pull Request in order to receive credit.

● I will review, but not accept your Pull Request. (If you e-mail me about this, I will assume that you are not reading my tips, and you might just lose a point.)

Grading

This exercise is worth 10 points, one per completed step.
